Reference Notes

DO NOT:

✕ **Do NOT apply a tourniquet** — it traps venom locally and causes tissue damage.
✕ **Do NOT suck the venom out** — this is ineffective and potentially harmful.
✕ **Do NOT cut the sting area** — increases infection risk and does not remove venom.
✕ **Do NOT apply ice or cool the sting area** — Israeli Ministry of Health (2026) explicitly advises against cooling.
✕ **Do NOT give the victim food or drink** — risks venom dispersal and may complicate hospital treatment.
✕ **Do NOT allow the victim to walk or move the stung limb** — movement accelerates venom circulation.

Equipment needed:

— Phone to call 101 (MDA) and optionally 04-7771900 (Poison Center)
— Phone or camera to photograph the scorpion if safe to do so

Hebrew Terminology — מונחים בעברית

English	עברית	Pronunciation
Scorpion	עקרב	ak-RAV
Scorpion sting	עקיצת עקרב	a-ki-TSAT ak-RAV
