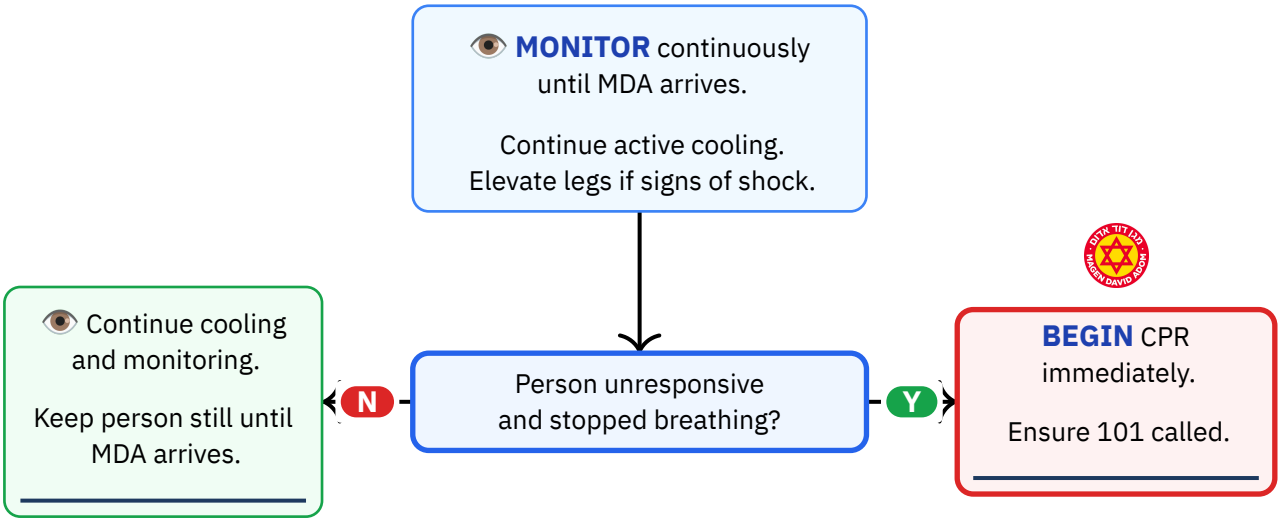
Continued Monitoring — Heat Stroke



Reference Notes

DO NOT:

✕ **Do NOT administer fever-reducing medications** (paracetamol, ibuprofen) — antipyretics do not work for environmental hyperthermia and may cause harm.
✕ **Do NOT give fluids** to a person who is not fully conscious or who cannot swallow safely.
✕ **Do NOT delay calling 101** for suspected heat stroke.
✕ **Do NOT ignore early signs of heat exhaustion** — it can progress to life-threatening heat stroke.
✕ **Do NOT leave the person unattended** while waiting for emergency services.

Equipment needed:

— Wet towels or cloths
— Cool/cold water (for spraying, pouring, and drinking)
— Cold packs or ice packs (if available)
— Fan or other means of air circulation (if available)

Hebrew Terminology — מונחים בעברית

English	עברית	Pronunciation
